DESIGNED FOR HYGIENE

Wudless, born from the passion of Sribal Construction Company, epitomizes innovation in the realm of Commercial Constructions, leveraging over 20 years of extensive expertise.

Under the guidance of visionary leadership, Sribal has garnered a prestigious clientele spanning various industries including Food/Pharma and FMCG.

Wudless emerges as the brainchild dedicated to revolutionizing the residential modular interiors sector. Established in May 2021, Wudless specializes in crafting bespoke Hybrid SS Modular Kitchen concepts, reflecting a commitment to excellence. With a nationwide service network, Wudless ensures prompt response times, reaching clients within 48 hours of receiving a request.

## Our Steel Story

Wudless is born from a love for product designing, a passion for engineering, and an ingenious spirit of innovation.

We are dedicated to delivering hygienic, durable, and sustainable solutions for kitchens worldwide.

A products that seamlessly blend form and function, ensuring a harmonious integration of aesthetics and utility.

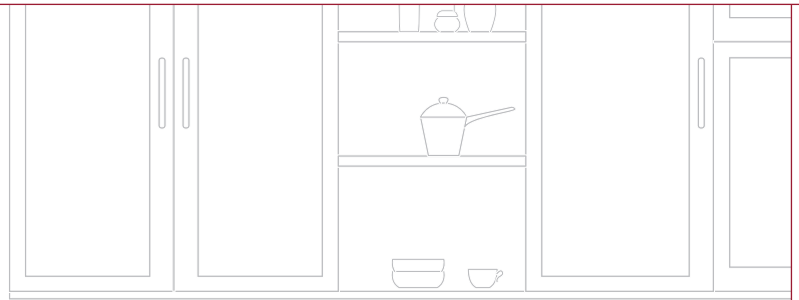

## At the heart of our philosophy are the 3Ws

### Wholly-owned manufacturing

We master precision in in-house manufacturing, eliminating outsourcing

### Well-crafted design customization

We excel in personalized design and bespoke solutions.

### World-class customer experience

We redefine memorable customer experiences with unwavering dedication.

## What is Kitchen Carcass

The Carcass is the frame work of the kitchen Cabinet itself, onto which the doors are hung and drawers are fitted.

Most Conventional Carcass are made of Plywood, Particle board, MDF, HDHMR etc all wood based materials

---

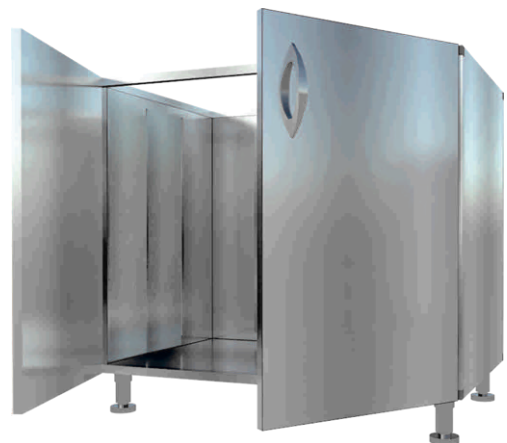

## What are the problems faced in Wood based Kitchen Carcasses

- Since these are wood based, it attracts moisture which leads to growth of fungus
- Easily affected by Termites and attracts cockroaches
- Termites eat wood and cockroaches spread diseases
- The most dangerous and toxic substance that is used in a kitchen are the anti-termite and anti-cockroach sprays and chemicals
- Wood is Prone to Fire
- Shorter life and higher replacement cost

---

## Wudless has pioneered the next step of evolution in kitchen cabinets

The hybrid kitchen cabinets from Wudless is an integration of a stainless steel Carcass which ensures hygiene and a laminated / Stainless steel door finish which enhances the aesthetic appeal

Anti-Cockroach

Durable

Moisture Proof

Anti-Fungal

ECO Friendly

100% Termite Free

Antibacterial

Washable Surface

Fire Resistant

## Why Wudless Stainless Carcasses

### Waterproof

Stainless Steel is waterproof and can be easily wiped to dry. Zero maintenance is required.

### Pest Resistant

Stainless Steel does not support the breeding of pests like Cockroaches and Termites.

Need for most dangerous and toxic anti-termite and anti-cockroach sprays and chemicals are eliminated from your kitchen.

### Hygiene

Stainless Steel ensures the best hygiene standards. World's best Food & Pharma appliances are made from food grade 304 Stainless Steel.

### Anti-microbial growth

Stainless Steel does not support the growth of microbiological organisms on its surface.

### Durable

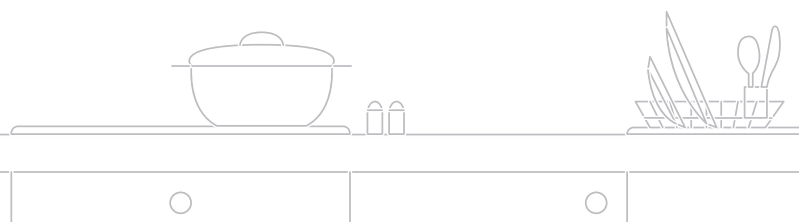

Highly durable, Food Grade Stainless Steel 304 material is used. 100% Salvageable even after life time use.

### Best Engineered Product

Wudless SS 304 kitchen carcass are reinforced with High Density Puff that enhances strength by 2 times yet lighter by half. The Puff fill eliminates noise from Carcass body and gives a silky touch

### Flexible and Easy to assemble

Easy to remove and re-fit in another location

**Wudless presents India's first  
patented Hybrid Kitchen**

## What is Hybrid kitchen?

Hybrid kitchens are undoubtedly the luxurious solution that is specialized in designs and also provides high quality. These kitchens are those that mix the old and the new. The carcass (inner section) is made up of Stainless steel, 304 grade, and the shutters are made up of Sustainable materials. These are safe for cooking, storage, and dining

---

## Why Hybrid kitchen?

These types of kitchens are quite the trend now as it is easy to see why : Hygiene is the key factor in a hybrid kitchen which increases and improve the functioning of kitchen space. Washing the Carcass ensures the kitchen quality as SS will withstand prolonged water usage, which in turn means more lifetime, low or nil maintenance, and environment friendly

## Why Wudless Hybrid kitchen?

Wudless is a top affordable interior designing company with more than a decade of experience in this industry. Apart from the above-mentioned advantages, the R&D team of Wudless had given more attention to detail during the product development.

**The specific details are,**

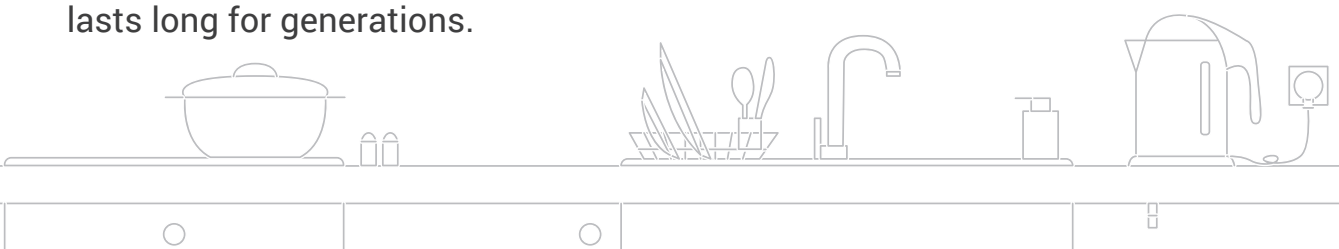

- Patented smart connection system which provides an elegant look and avoids SS welding.
- Patented sandwich puffed layer for the bottom cabinet which gives more strength, and in turn can withstand more weight.
- Universal hardware fittings any brand hardware will easily fit into Wudless' SS cabinets.
- Flexibility of choosing different types of laminates for the shutter- (High gloss, Matt finish, Acrylic).

---

## How much does it cost?

There is a myth that stainless steel kitchen costs more. Wudless breaks this by,

- Optimising the own SS factory process
- Using stainless steel only in the base cabinets where the water usage will be high.
- Wall units will be conventional engineered material.
- Costs just more than the conventional modular wooden kitchen but lasts long for generations.
